DATE <u>10-23-61</u>

Dear Ellsburg:

I have just received your P-2173, "Risk, Ambiguity, and the Savage Axioms." Without yet having had time to study it myself, I am certain that other Bayesians would be interested in it. Above all, I would appreciate your sending a copy to Bruno de Finetti, via Poggio Catino 7, Roma 144, Italy. Others who would doubtless be interested are, Robert Schlaifer, Howard Raiffa, and John Pratt at the Harvard School of Business; Herman Rubin at the Department of Statistics at Michigan State University; Millard Hastay, School of Economics and Business, Washington State University, Pullman, Washington; Harry Roberts, School of Business, University of Chicago, Chicago 37; and Dennis Lindley, Department of Statistics, University of Aberystwyth, Wales.

Best regards,

Jimmie Savage
